Projects

Pizza Time - *Leaflet API | React | Mobile-first | Form Validations | CSS* ⬈

Options to select size/portions, move items to the cart, remove items, and modify the number of cart items. A restaurant with an online menu and at least 100 dishes.

Rest Countries - *Rest API | React | Desktop-first | CSS | Flex* ⬈

Integrated with the REST Countries V2 API to pull country data and display all countries, filter by regions or search for a specific country. Pixel-perfect website inspired by a Figma design file.

Bankist - *DOM Manipulation and EventListeners | Vanilla JavaScript | CSS* ⬈

Fictional online bank with 2 fictional accounts and functionalities such as login, money transfer, loan request, account deletion, and login validation.

Edgy - *React | Fully Responsive | Tailwind* ⬈

React Router implements the possibility to effortlessly navigate to any page and adapt the URL. Responsive landing page for Instagram growth agency with over 8 pages such as pricing, contact form, blog, and careers page.

Forkify - *Forkify API Semantic | Vanilla JavaScript | HTML | CSS* ⬈

Vanilla JavaScript application that displays thousands of recipes by fetching data from Forkify API and additional features such as discovering new recipes, saving or generating a custom recipe.

Guess My Number - *Vanilla JavaScript | Mobile-first Workflow | CSS |* ⬈

A game where the user must guess a randomly generated number from 1 to 20. Built with DOM Manipulation, and the built-in function that generates a random number in the range 0 to less than 1.

Professional Experience
